

My 2D FDTD

Yizhao Guan

Research Description

Microfluidics system

Microgroove

How a microgroove response to oblique incident light?

FDTD Model

Microgroove model

−

Air model

=

?

Subtraction between two model gives reflection.
This code is to simulate this result.

Features

- Support PML boundary and periodic boundary
 - Modify NPML value, 0 will lead to periodic boundary.
- Support TM and TE wave
- Support oblique incident
